

MISSION

To produce and present world-class research that fuels emerging mission movements and leaders.

VISION

To see the worldwide Christian community make Spirit-guided use of research information to stimulate mission interest, shape mission appropriately and carry it out effectively.

FOCUS

GMI's highest priority is to serve evangelical mission leaders in the developing world through partnership with like-minded organizations.

FAITH

GMI's board and staff are committed to evangelical faith and life. We subscribe to the Lausanne Covenant and the doctrinal statement of the National Association of Evangelicals.

CORE VALUES

With a heart focused on God's mission in the world, guided and empowered by his Spirit, we produce and present applied research, serving others with excellence through respectful partnerships.

GLOBAL MAPPING INTERNATIONAL

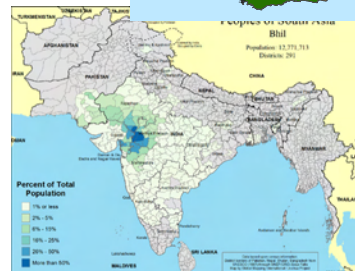

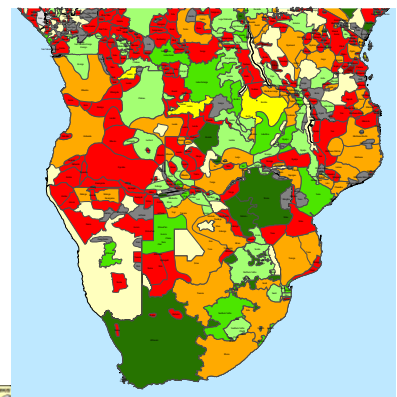

STRATEGIC MISSION RESEARCH AND MAPPING

GMI provides geographic mapping, applied research and information publishing services and products for the international evangelical missions community.

GEOGRAPHIC MAPPING

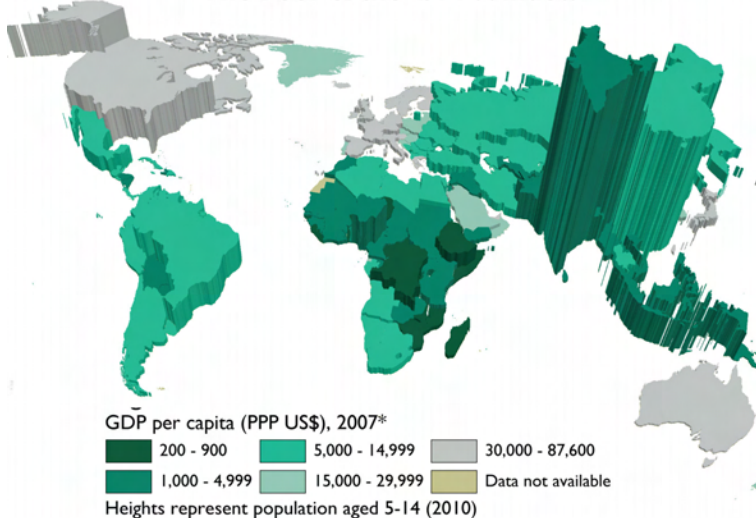

GMI creates and delivers geographic mapping software, data sets, training and services to help mission leaders better see, plan, coordinate and communicate their work. During 2009, we:

- » Published version 3.3 of the Global Ministry Mapping System, the geographic information system (GIS) used by 270 Christian ministries in 39 countries, providing training, consulting and support for users worldwide.
- » Upgraded the World Language Mapping System, the most comprehensive and trusted mapping of the world's nearly 7,000 ethno-linguistic peoples, to align with SIL's new 16th edition *Ethnologue*, including coverage of wide-spread languages.
- » Updated the Seamless Digital Chart of the World, our detailed global map of physical and political geography, with a new global classification system for rivers, lakes and streams.
- » Updated the Omid database of the peoples, languages and religions of South Asia, with population statistics by district.
- » Published an updated Populated Places database of 2.3 million cities, towns and villages.

- » Expanded our custom mapping service to design and create maps dozens of missions analysis projects, including maps for Lausanne in preparation for Cape Town 2010.

The Poor & the 4/14 Window

- » Enhanced our free online mapping services via Mission InfoBank for users to create and download maps of online mission databases.
- » Continued our mapping and training work with Christian health care coalitions in Tanzania, Liberia, and Congo.
- » Completed a two-year partnership with TEAM to strengthen their international research and mapping capacity.
- » Completed year three of the LIGHT India project to build the mapping capacity of church and mission leaders for enhanced, sustained kingdom growth in India.

MISSION RESEARCH AND INFORMATION PUBLISHING

GMI conducts collaborative research projects and client research, trains missionaries in conducting applied research, and publishes and distributes mission research resources to help mission leaders see their world more clearly. During 2009, we:

- » Revised and expanded our Breakthrough research training curriculum and taught week-long Breakthrough seminars to 57 participants at ECWA Theological Seminary, World Link Graduate Center, Wheaton College Graduate School, and Overseas Ministries Study Center.

- » Further developed a partnership to research best practices in church-planting among cross-cultural teams in unreached areas.
- » Built on our Oxford Initiative research from the previous year to work on developing standards for sharing funds in cross-cultural mission partnerships.

- » Conducted a second round of Impact! research surveying missionary field leaders on personal and leadership issues, published results and led a seminar to explore implications of the findings.

» Did story-gathering among local leaders in a Central Asian country, including numerous Skype calls and a two-week trip, as part of an experimental partnership network.

» Used our research panels to help missions leaders hear directly from missionary candidates.

» Hosted and maintained three websites providing access to key information collections: Mission InfoBank, Operation World, and MisLinks.

» Created major sets of maps for Patrick Johnstone's forthcoming book on mission trends, *The Future of the Worldwide Church*; created graphics templates and converted content into the templates in preparation for developing a CD-ROM and website version of the work.

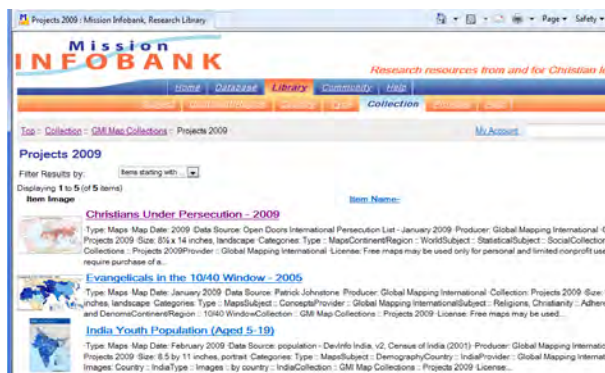

» Completed preliminary mapping design and development work to create a CD-ROM version and website version of the next edition of *Operation World*.

» Provided CD-ROMs (Operation World, Operation China, Peoples of the Buddhist World, World of Islam, WorldVue) and books (*Breakthrough, A Reader's Guide to Transforming Mission, American Cultural Baggage*) to 550 mission leaders.

of Islam, WorldVue) and books (*Breakthrough, A Reader's Guide to Transforming Mission, American Cultural Baggage*) to 550 mission leaders.

» Launched Phase 2 of Mission InfoBank development, completing major hardware upgrades to improve system performance and reliability, adding new software features and substantial new data collections, increasing usage to 5,000 unique visits per month.

» Partnered with Scott Moreau in researching and writing four issues of "Missions on the Web" for *Evangelical Missions Quarterly* with corresponding pages for the MisLinks website.

» Contributed to mission research through a variety of speaking, writing and consulting opportunities.
